Sun - Mon Closed

# Need To KNOW

## INDISPENSABLE TIPS FOR DECK INSTALLATION

Before you begin, we want to share a few essential deck installation pointers to get you started on the right foot with what you need to know about exotic hardwood decking; specifically, Ipe, Massaranduba, Cumaru, and Garapa.

Ipe decking is the finest natural wood decking available today. Resistant to rot, infestation, fungal attacks, and fire, Ipe promises to deliver strength and resiliency for many years. Ipe is air-dried to 16-20 percent moisture content (MC). This drying process drives down the MC gradually, over an extended period, helping the wood retain some of its natural elasticity to adapt (shrink or expand) to various changes in humidity. Over time, when installed as part of a deck, air-dried lumber will gradually dry or shrink in size as the boards lose more moisture. Much of this change shows in the spacing between installed deck boards. Therefore, when installing Ipe, allow for a 1/8" gap between the boards since they will continue to lose moisture, or shrink, as they dry over time.

Massaranduba, Garapa, and Cumaru, on the other hand, are partially kiln dried to 12-16 percent MC. Kiln drying is unique to air drying because the MC is driven-down or lowered faster by using heat. Kiln-dried lumber is usually associated with lumber for making furniture, intended for use inside a home, where the humidity is controlled compared to outdoors. When wood is kiln dried and installed as outdoor decking, certain precautions must be taken. Since the boards are usually drier, kiln-dried boards will likely expand in humid conditions, necessitating a wider gap when spacing the deck boards. For that reason, install Massaranduba, Garapa, and Cumaru material with a minimum 3/16" space between 4" planks and 1/4" space between 6" planks. This wider spacing promotes air circulation, allows drainage, and leaves room for shrinkage and expansion between the boards.

After you've made your choice between Ipe, Massaranduba, Cumaru, or Garapa, don't forget to follow these steps before installation. 1) Make sure you store the material out of direct sunlight, off the ground, and in a cool, dry place to help the decking equalize to the ambient MC of its new environment. 2) Design your deck to stand at least 24" above the ground and be open on at least three sides to promote adequate cross ventilation. 3) When you cut boards to length, reseal the newly cut end grain with Anchorseal, a wax end sealer that helps reduce end splitting. 4) Use stainless steel fasteners for superior corrosion resistance, maximum holding power, and ease of use. Face screwing is one option; however, we recommend a hidden-type fastening system like those offered by Deckmaster or EB-TY. In any case, pre-drill before driving any fastener.

After finishing your deck, clean the surface and allow it to dry for at least two days before applying a high-quality penetrating oil-based sealer with UV inhibitors. We recommend using the Hardwood Exterior Formula from Penofin. Within 3-6 months, follow up by applying another coat. These applications help saturate the wood fibers, adding protection to preserve your deck and make "maintenance" coats less frequent. Over time, apply this finish periodically to maintain the wood's rich natural color.

Above all else, please don't hesitate to give us a call with any solid hardwood decking material questions.

# Maximise Your DECK'S POTENTIAL

Take a moment to ask yourself if your deck meets your lifestyle needs. How often are you utilizing your deck? Not that much? Look over the current trends in features for decks that add convenient ways to use your deck more fully.

## MAKE YOUR DECK WORK HARDER FOR YOU

Adding an arbor to your deck is a popular option that adds increased functionality to your outdoor space, giving you the feeling of an additional room. Pavilions are great for casting partial shade on sunny areas. Once you have that arbor built, adding climbing vines will provide even more shade from the sun.

## MAKE YOUR DECK MULTI-FUNCTIONAL

A deck can be multi-functional for dining, relaxing to music while taking in the sun's warm rays, and grilling. Plan a deck large enough to accommodate your needs. Consider creating different levels to your deck to define areas for other use. For example, making transitional steps an additional board wider between the various deck levels provides additional seating for parties.

## SEATING THAT DOUBLES AS STORAGE

Speaking of seating, window seats inside homes add a warm, welcoming feel. These built-in benches work just as well on outdoor decks. In addition, they offer valuable storage below the seating. The striking ambiance they give is enhanced when you add bold-patterned cushions in fabrics that stand up to the elements.

# Domestic Hardwoods

As a company dedicated to quality, we prioritize meeting or exceeding our customers' expectations. NHLA inspection plaques are on display in our office, depicting the date of a National inspection after we challenged a lumber delivery. The company has never lost a challenge.

## LUMBER PRICING

Prices listed are for rough lumber, sold random width, and random length. The lumber is manufactured to produce the best possible appearance while conserving the maximum usable product of the log. We bring in new lumber multiple times each week. Therefore, prices are subject to change without notice.

## PRICE LEVELS | BUNK QUANTITY PRICING

You may accumulate the footage of different species in the same order to determine the price level. Be sure to ask us about special pricing on bunk quantities 300+. Mixed units do not qualify for pack pricing.

## SPECIAL SIZES

We can supply you with specific widths, lengths, colors, or grain patterns to minimize your waste factor. Contact us for pricing on your particular requirements. 800-292-5937.

## MEASUREMENTS

Kiln-dried lumber from printed prices is measured after kiln drying and sold on a net tally. No additions are made to cover any shrinkage during kiln drying. All thicknesses less than 1" are measured in surface feet.

## FULL UNIT PRICING

Your unsorted lumber units are available, net tally. Packages are offered to you at NHLA grading standards for hardwoods and may include up to 4% below grade. Lumber packages come in random widths. Lengths typically are uniform 7'-8", 9'-10', 11'-12', 13'-14', 15'-16' per pack. Only 300' net tally minimum per item to qualify for unit pricing if a unit of 600' or more is available to split.

## SATISFACTION GUARANTEED

Your lumber purchases are fully guaranteed to be properly graded, measured and machined. We are unable to guarantee products against loss or damage in transit due to circumstances beyond our control. The package must be in the same condition in which it was received To receive full credit.

## INCREASE YOUR PROFITS WITH OUR MACHINE SERVICES

Many woodworkers are turning to us for increased efficiencies in their production processes. Better efficiencies mean higher profits.

We offer a variety of lumber manufacturing services, including resawing, planing, ripping, sanding, and gluing into panels. In most cases, we can deliver your order the next day. Page 28 provides complete machine service information.

# Imported Hardwoods

As a company renowned for its commitment to quality, we are confident in our ability to guarantee 100% satisfaction to our customers. NHLA inspection plaques are on display in our Charlotte office depicting the date of a National inspection after we challenged a lumber delivery. The company has never lost a challenge.

## LUMBER PRICING

Prices listed are for rough lumber, sold random width, and random length. The lumber is manufactured to produce the best possible appearance while conserving the maximum usable product of the log. We bring in new lumber multiple times each week. Therefore, prices are subject to change without notice.

## PRICE LEVELS

You may accumulate the footage of different species in the same order to determine the price level. Be sure to ask us about special pricing on bunk quantities 300+. Mixed units do not qualify for pack pricing.

## SPECIAL SIZES

We can supply you with specific widths, lengths, colors, or grain patterns to minimize your waste factor. Contact us for pricing on your particular requirements. 800-292-5937.

## MEASUREMENTS

Kiln-dried lumber from printed prices is measured after kiln drying and sold on a net tally. No additions are made to cover any shrinkage during kiln drying. All thicknesses less than 1" are measured in surface feet.

## SATISFACTION GUARANTEED

Your lumber purchases are fully guaranteed to be properly graded, measured and machined. We are unable to guarantee products against loss or damage in transit due to circumstances beyond our control. The package must be in the same condition in which it was received to receive full credit.

## PLEASE NOTE:

Prices are subject to change without notice.

## FULL UNIT PRICING

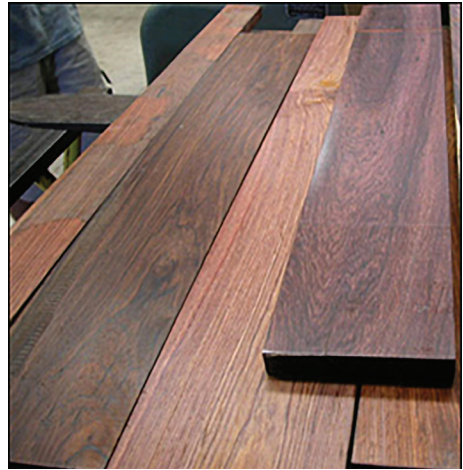

Your unsorted lumber units are available, net tally. Packages are offered to you at NHLA grading standards for hardwoods and may include up to 4% below grade. Lumber packages come in random widths. Lengths typically are uniform 7'-8", 9'-10', 11'-12', 13'-14', 15'-16' per pack. Only 300' net tally minimum per item to qualify for unit pricing if a unit of 600' or more is available to split.

# IMPORTED Hardwood Decking

Known world-wide as the toughest,  
most durable decking material

We offer a wide range of outdoor solid wood options, from Western Red Cedar to imported exotics like Ipe, Cumaru, Garapa, Massaranduba, and Tigerwood.

Do you have a growing list of projects such as decking, fencing, siding, and outdoor furniture? You'll find our prices very competitive with WPC. Feel free to call us or come in. We'll show you greener options.

## JOB-LOT QUANTITIES

All accessories are available in job-lot quantities. Accessories include:

Anchorseal® End Sealer

Penofin Bronze Label Sealer

EB-TV® Hidden Fastener System

## SYSTEM THREE EPOXY

Superior adhesion, resiliency, and moisture resistance unlikely to crack, split or delaminate. System Three Epoxy has an indefinite shelf life and is D.O.T. classified as non-flammable. Please call for pricing, 800-292-5937.

# Domestic & Imported Plywood

THE POWER OF PLY...  
STRENGTH & TRUST COMBINED

## PLEASE NOTE

Prices are subject to change without notice.

## PRICING

Plywood prices listed are per sheet. 1 thru 10pc pricing may be obtained by mixing thicknesses and specie.

## DIMENSIONS

4'x8', 4'x10' and 5'x5' sheets are in stock. Other sheet sizes available by special order with minimum quantity requirement. *Call for details 800.292.5937.*

**Thickness:** 1/8", 1/4", 3/8", 1/2", 3/4", and 1" in stock.

Other thicknesses available by special order. *Call for more details 800.292.5937.*

## QUALITY ASSURANCE

Our Baltic Birch Plywood is produced by a quality controlled process using a superior glue bond coupled with a multi-ply design, giving the plywood superior strength, rigidity and dimensional stability. The foreign grading system uses alpha designations to refer to the quality of the plywood (B(S), BB, CP, L, and C) with B(S) being the best. The first set of letters refers to the face. The second set refers to the back.

# Custom Panels

AVAILABLE IN 55 SPECIES

## SUPER-SIZED EDGE-GLUED PANELS MADE-TO-ORDER

**UP TO 42" IN WIDTH AND 16' IN LENGTH**

We manufacture custom edge-glued and butcher-block panels made from random-width lumber. To provide you with the finest possible product, each board is precisely glued and dimensioned to your specifications with exacting attention given to grain, figure, and color matching. Furthermore, each panel has sufficient overlength to best accommodate your needs.

### **BUY IN BULK AND SAVE**

Order custom solid wood edge-glued panels for your commercial projects. We have the state-of-the-art equipment to produce large volume orders with 10 - 14 days notice.

**BACKGROUND IMAGE:** This custom-made Walnut edge-glued panel measures 1-1/2 x 38" x 72" and is just one of many we have made for customers.

# READY-MADE IN-STOCK BUTCHER BLOCK TOPS

THE MOST  
BEAUTIFUL  
HARD WEARING  
TOPS YOU'LL  
EVER FIND

From the Wood Welded Companies of Bally Block, these remarkable panels are laminated edge-grain northern hard rock maple finished with Durakryl 102®, a non-toxic coating resistant to alcohol, bleach, paint thinner, and most other solvents. These tops have one of the strongest, most durable flat surfaces you can find.

# FESTOOL

## BUILT BETTER TO BUILD BETTER

## A SUPPORTIVE STRENGTH BOOST

Festool ExoActive Exoskeleton  
EXO 18 HPC 4.0 -Plus | #577340  
**\$3,495.00**

### WITH THE NEW EXOACTIVE, FESTOOL PRESENTS ITS FIRST ACTIVE EXOSKELETON

The battery-powered ExoActive exoskeleton will make light work of strenuous overhead tasks. Whether dry mortarless construction, painting, wallpapering or installation, whether on walls or ceilings, the ExoActive exoskeleton gives users an added boost when their arms get tired and takes the load off their neck. By

reducing the stress on their body, they can work more effectively, focus more on the quality of their work, and ultimately get more enjoyment out of what they are doing. They can adjust the required support level on the exoskeleton in a matter of seconds so they get targeted support precisely where it's needed. The ExoActive is comfortable and easy to wear, just like a rucksack, and can be quickly adjusted to the user's individual body size.

## THE CONTINENTAL USA

Please call 800-292-5937 for a quote on deliveries via LTL.

## MICHIGAN, INDIANA & OHIO

### DELIVERY ON OUR TRUCKS

"Just a short note to thank you for the ease of delivery with our first order. Your driver showed up within inches of the shop, never having been here before. He was cordial and a real pro, the entire time. We hope to see him again in the near future..." -- J.C.

**WE DON'T CHARGE FOR** delivery of plywood, equipment, veneers, dowels, finishes, glues, etc. when accompanying your lumber order shipped on our trucks.

### WE DO CHARGE FOR

**Lumber and plywood shipments** using our trucks, based on one driver, one truck, ground level delivery from our Charlotte MI warehouse. A lift truck must be available for unloading equipment orders.

**Equipment/Machinery deliveries** not accompanied by lumber orders are \$100/hr based on actual round trip time, \$100 minimum charge.

**ADDITIONAL SERVICES.** We provide additional services for your convenience... set up, unassisted delivery (no one home), and carry back to shop. Please call to inquire about the minimal charges for these services. 800-292-5937.
